

Hello,

I am writing to express my interest in the 'Integration Systems Analyst' position. I have more than 9 years of experience in healthcare (diagnostic imaging) and have in-depth experience with healthcare applications both as end-user and from an application/ implementation specialist perspective. I have worked with healthcare standards such as HL7 & DICOM and have development experience with Python, C#, JavaScript and related frameworks/libraries such as React, Django and ASP.NET core. During these development projects I used SQL and several RDMS such as MySQL, MSSQL and Postgres. I am also familiar with or have used many of the technologies mentioned in the job posting.

In my current role I work with vendors to manage and test new implementations, upgrades, & patches from customer's point of view. I believe the knowledge and experience I have gained from this role will assist me to become an Integration Systems Analyst for TELUS Health.

Aside from this related experience, I am passionate about working with different technologies, and relentless in my pursuit of developing myself through any available educational opportunities. I am confident that I will be able to pick up any lacking skills and abilities through hands on experience, effort and dedication.

I look forward to hearing from you to discuss my suitability further. You can contact me via phone at 226-450-0655 or via email at echoshihab@gmail.com

Thank you,
Shihab Khan
